

Computer Science 2 Project	Team Members:	Febby Joyce D. Cadalso
Group Progress Report		Christian A. Bagaindoc
3rd Quarter		
<b>Week 3 - Jan 30, 2026 (covers week 5)</b>		
<b>GOAL</b> State your goal for the Week	<b>DATA COLLECTED</b> State/list the data collected relevant to your project	<b>PROGRESS</b> State the progress you have made so far by the end of the week
Added a checkmark to the todo-list to be seen in GUI		Successfully added a checkmark in the to-do list
<b>STRENGTH</b>		
Successfully added a place where the user can "check" thier task in the to-do list, with the text being crossed out.		
<b>AREAS FOR DEVELOPMENT</b>		
Add a delete function for the to-do list.		
Improve the timer by adding a pause & play irrelevant to the timer cycles (of work & rest).		
Integrate the to-do list code & timer code into one code line, as they are still segregated for now.		
<b>STRATEGY FOR SUCCESS</b>		
Add comments when we will now do the integration, so that the other will know what that specific code does.		
Try to make time to do this project, as during these few weeks, there have been plenty of projects & exams.
